

Draw Two Shapes

What You Need

- same color crayon for each child
- Shape Name Cards
- Recording Sheet

Check Understanding

Draw two different rectangles using the same color crayon. Tell why both are rectangles.

What You Do

1. Mix and stack the cards facedown.
2. Take turns. Pick a card. Read the shape name. Place the card on your **Recording Sheet**.
3. Draw the shape named. Your partner draws a different looking shape with the same name.
4. Tell how both shapes match the shape name. If any shape does not match the name, cross it out and draw a new one.

I have to think about what makes a shape that shape and what doesn't matter.

Go Further!

Draw three different shapes that have four sides that are not squares. Tell why they are not squares.
