Requirements for Oral Presentation

Remember: This is a PowerPoint/Google Slide presentation of your project. It will include all of the materials that you would normally display on a board. There are a couple of items to remember as you do this. Hit the highlights of the materials and procedures. Present the most important part of your data and have a graph. Write down your most important discussion can conclusion points, but <u>be prepared to talk about what you did in a lot of detail.</u>

Here is what you need to have in the presentation: (The number of slides is an approximate, things can be condensed or expanded as needed.) Keep in mind that you do not want a lot of text on your slides.

Slide 1:   Title/Names/Class Period

Slide 2:   Introduction/Background Knowledge

Slide 3:   Question/Identify the problem

Slide 4:   Imagine/Brainstorm Ideas

Slide 5:   Plan your Design

Slide 6:   Development Work

Slide 7:   Building of prototype

Slide 8:   Materials List

Slide 9-10:   Step-by-Step procedure (approx. 8-10 steps)

Slide 11:   Chart of Graph of data

Slide 12:   Testing Data Analysis

Slide 13:   Evaluate/Redesign/Share Solutions

Slide 14:   Future research and improvements
