Title: _____

The diagram consists of a large outer rectangle. A vertical line runs from the top edge to the bottom edge, and a horizontal line runs from the left edge to the right edge, intersecting at the center. This creates four equal-sized quadrants. In the center of the frame, there is a smaller horizontal rectangle that overlaps the horizontal line. The top and bottom edges of this smaller rectangle are parallel to the horizontal line, and its left and right edges are parallel to the vertical line.
