

## Lesson 5 Reteach

### Subtract Three-Digit Numbers

You can use models to help you regroup when you subtract.

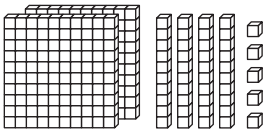

$$\begin{array}{r} \phantom{3}^5 \phantom{0}^{13} \\ 3\cancel{6}\cancel{3} \\ - 28 \\ \hline 335 \end{array}$$

**Remember:**

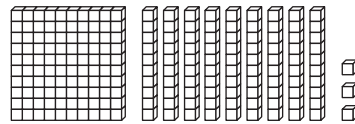

- Regroup 1 ten as 10 ones.
- Rename 63 as 5 tens 13 ones.

**Use models to subtract.**

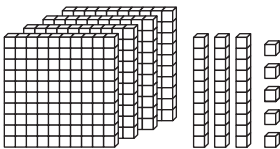

1.  $245 - 19 = \underline{226}$

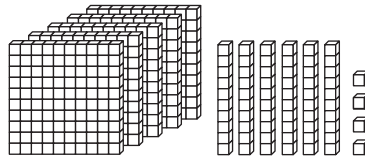

2.  $193 - 44 = \underline{149}$

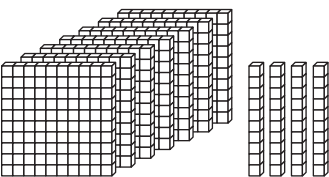

3.  $435 - 219 = \underline{216}$

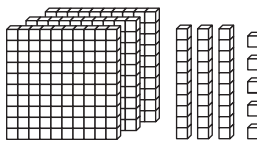

4.  $564 - 228 = \underline{336}$

5.  $740 - 426 = \underline{314}$

6.  $335 - 127 = \underline{208}$

**Subtract. Check your answer.**

7.  $962 - 722 = \underline{240}$

8.  $681 - 361 = \underline{320}$

9.  $750 - 136 = \underline{614}$

10.  $635 - 219 = \underline{416}$

11.  $865 - 839 = \underline{26}$

12.  $942 - 927 = \underline{15}$
