

Lesson 2 Reteach

Estimate Differences

To estimate a difference, round each number. Then subtract.

<p>Round to the nearest ten.</p> $2,634 - 1,627$ <div style="display: flex; justify-content: space-around; width: 100%;"> <div style="text-align: center;">↓</div> <div style="text-align: center;">↓</div> </div> $2,630 - 1,630 = 1,000$	<p>Round to the nearest hundred.</p> $2,635 - 1,597$ <div style="display: flex; justify-content: space-around; width: 100%;"> <div style="text-align: center;">↓</div> <div style="text-align: center;">↓</div> </div> $2,600 - 1,600 = 1,000$
