## Student Glossary

| Vocabulary      | Description or Example  |
|-----------------|---|
| circle          | <p>A closed round shape. Circles do not have sides and vertices.</p>                   |
| composite shape | <p>Two or more shapes that are put together to make a new shape.</p>                  |
| equal parts     | <p>Parts of a whole that have the same size.</p>                                     |
| fourths         | <p>Four equal parts of a whole. Each part is a quarter or fourth of the whole.</p>  |

## Student Glossary *(continued)*

| Vocabulary | Description or Example  |
|------------|---|
| halves     | <p>Two equal parts of a whole. Each part is a half of the whole.</p>  <p>The diagram shows a single rectangle on the left. An arrow points to the right, where the same rectangle is shown again, but with a vertical line down the center, dividing it into two equal halves.</p> |
| rectangle  | <p>A closed two-dimensional shape with four sides and four vertices. It has the same shape as a dollar bill.</p>  <p>The diagram shows a simple rectangle with four sides and four vertices.</p>  |
| side       | <p>One of the line segments that make up a shape.</p>  <p>The diagram shows an inverted triangle. A small arrow points down to the top horizontal side of the triangle.</p>  |
